

Atlantic Superbike Championship to Double Header Format in 2009.

In 2009 race fans will have twice as much to cheer about as amateur superbike and pro superbike competitors will race on Saturday and Sunday of ARL's Atlantic Roadracing Series. In 2009 the Saturday "open" category has been eliminated and replaced with Superbike Race 1 for both the amateur and Pro fields. The superbike class consists of the largest displacement machines running the fastest race for the most laps and for that reason the winner of that class is crowned the Atlantic Roadracing Champion. In 2009 the spectators and competitors can expect to see some of the closest battles in recent history under ARL's new Superbike double header format. Both amateur and pro riders in the superbike class will have 2 races per weekend contributing points to their championship efforts. In addition, points secured in round 6 of the Parts Canada Superbike Championship will count towards the Atlantic Championship.

The level of racing in Atlantic Canada is higher than it has ever been. ARL series competitors, sponsors and fans are looking forward to this exciting new development in the country's fastest growing championship. Round 1 of the Atlantic Roadracing Championship is slated for May 16th-17th with Amateur and Pro Superbike Race 1 on Saturday and Race 2 on Sunday.

Atlantic Roadracing League Inc is the promoter of all Atlantic motorcycle road racing action at Atlantic Motorsport Park. The Atlantic series consists of five rounds of racing that includes classes from Superbike to Vintage and everything in between. In addition to racing activities in 2009 ARL will promote High Performance Riding Schools, track days, along with "race focused" Peak performance schools. For information on these and other activities please go to www.atlanticroadracing.com.
